

We invest millions annually

**Remove. Replace.
Repeat.**

So water is always there
when you need it.

 **TENNESSEE
AMERICAN WATER**

tennesseeamwater.com

- TAW puts in approximately 23,000 feet of new pipe per year into the system
- In 2015, Tennessee American Water completes a \$17 million capital investment for a dewatering facility which extracts the water left in the residuals of dirt and minerals when drawn from the Tennessee River. A portion of the extracted water will be recycled back to the plant for treatment. The residuals byproduct will be removed by a contractor for land application and allow the City of Chattanooga's wastewater treatment facility to be in compliance with Clean Water Act requirements.
